

**Supplier name:** Flexicare Medical

**Publication date:** 01 March 2023

## Commitment to achieving Net Zero

Flexicare Medical is committed to achieving Net Zero emissions by 2045.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year:	2020
<a href="#">Additional Details relating to the Baseline Emissions calculations.</a>	
This is the company's baseline.	
Baseline year emissions:	
EMISSIONS	TOTAL (t CO <sub>2</sub> e)
Scope 1	63
Scope 2	104
Scope 3 (Included Sources)	1153
<b>Total Emissions</b>	<b>1320</b>

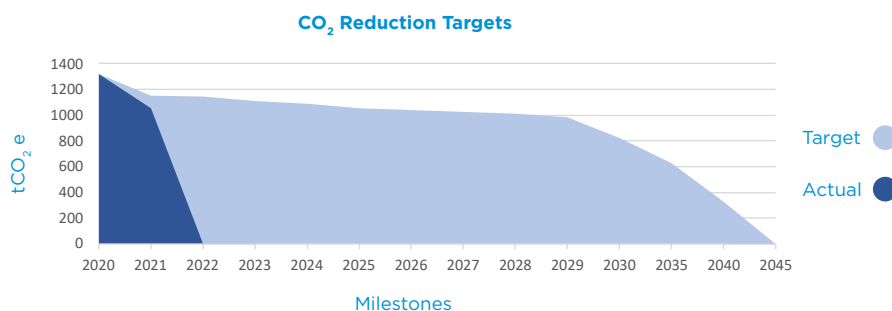

## Current Emissions Reporting

Reporting Year:	2021
EMISSIONS	TOTAL (t CO <sub>2</sub> e)
Scope 1	55
Scope 2	90
Scope 3 (Included Sources)	908
<b>Total Emissions</b>	<b>1053</b>

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next five years to 1040t CO<sub>2</sub>e by 2028. This is a reduction of 10%

Progress against these targets can be seen in the graph below:

# Carbon Reduction Projects

## Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2020 baseline. The carbon emission reduction achieved by these schemes equate to 267t CO<sub>2</sub>e, a 21% reduction against the baseline and the measures will be in effect when performing the contract.

### Overview of initiatives delivered to date:

- Certified ISO 14001(August 2022)
- Changing the leased car fleet to hybrid vehicles from diesel vehicles.
- Utilised internet-based communication apps & software rather than travelling for business. The emissions per £1m of revenue decreased dramatically due the reduction in incoming freight, a result of inventory management and requirements of the UK business during the period. The company continues to look for ways to reduce its energy consumption.

### In the future we hope to implement further measures such as:

- Undertaking cost analysis and supplier selection for implementation of Solar Panels and other technologies for use in core business usage.
- Rolling out LED lights across the offices with auto off switches in permissible areas.
- Reducing inks used on product cartons.
- Improving the volume of recycled materials in product packaging.
- Selectively reducing plastic in product packaging.
- Developing products which remove the composition of PVC.

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
